PROFILE

As an ambitious and honest software developer, I bring over two years of hands-on experience in React.js. My primary goal is to create high-quality projects that not only meet client and user needs but exceed expectations. I am committed to staying updated with industry trends to ensure that my skills remain cutting-edge. With a passion for crafting innovative solutions, I am excited about contributing to meaningful projects that make a positive impact.

SKILLS

- React.js | Next.js | Javascript | Typescript | Rest/Axios Api | Api Integration | Tawlind Css | Redux Toolkit | Google Maps | Node.js | Express.js | React.js | Git / GitHub | Bootstrap | Material UI | Jira | Third party libraries

EDUCATION

Bs Software Engineering

PMAS Arid Agriculture University

07/2018 – 06/2022 | Rawalpindi, Pakistan

PROJECTS

Lucky Cement Limited

- I played a pivotal role in the development of Lucky Cement Limited's ERP-based React.js web application.
- The application served as a central hub for modernizing and centralizing user data.
- Responsibilities included the development of multiple modules, involving CRUD operations.
- Ensured seamless integration of various libraries within the application.
- The project significantly contributed to improving operational efficiency and data management within the organization.
- Resulted in a streamlined and user-friendly experience for all stakeholders.

Mangtum

- Contributed to Mangtum, a global marketplace fostering international trade and commerce.
- Took charge of developing various modules within the platform.
- Encompassed essential CRUD operations to manage the buying and selling of products and services.
- Designed and ensured the responsiveness of user interfaces.
- Focused on delivering an enhanced user experience for the global marketplace.

Paysa

- Played a key role in shaping Paysa's portfolio, elevating it as a prominent digital banking service provider in Pakistan.
- Utilized Next.js to develop and optimize the portfolio, ensuring a smooth and efficient user experience.
- Integrated innovative solutions, contributing to the enhancement of Paysa's digital banking services.

Psychometric

- Contributed to the development of Psychometric, an online test platform designed for Pakistan State Oil Company Limited (PSO).
- Played a role in enhancing employee assessment processes and talent management capabilities through the implementation of Psychometric.

- Key responsibilities include implementing responsive design strategies, integrating APIs with Axios, and incorporating third-party libraries to enhance app functionality.
- Gained hands-on experience in React JS development, honing skills in front-end web development.
- Contributions in this role have played a significant part in the success of Joyn Group's digital products.

AlrightTech

React.js

04/2022 – 02/2023 |

Rawalpindi, Pakistan

- Acquired a comprehensive understanding of React.js during my time at AlrightTech.
- Gained expertise in constructing web applications from the ground up, utilizing modern development practices and tools.
- Worked extensively on user interfaces, ensuring they were user-friendly and visually appealing.
- Focused on implementing responsiveness to ensure optimal user experiences across various devices.
- Developed a strong foundation in React.js development and user interface design, allowing me to build responsive web applications proficiently while adhering to best practices.

LANGUAGES

English

Urdu

- Collaborated on the creation of an efficient online testing platform tailored to meet the specific needs of PSO.

Chatkrow

- ChatKrow is a versatile website that seamlessly integrates user authentication modules with an intelligent conversational interface.
- The user profile screen on the website includes essential details such as a profile image, email, and password, providing users with comprehensive account management features.
- The website's primary focus lies in its interactive chat interface. Users can actively engage in conversations by posing questions, creating an immersive experience without the use of a chatbot.

Atlas Foods

- Implemented advanced functionalities within the HRM system, enabling real-time monitoring of sales and purchase transactions for streamlined financial management.
- The HRM system for Atlas Foods serves as a centralized solution, facilitating seamless tracking of sales and purchases while providing timely updates to employees through notification features.
- Integrated WhatsApp API to enable bulk messaging, enhancing communication efficiency for seamless outreach at Atlas Foods.
